MCO1 R Test Script:

Method	#	Test Description	Sample Input	Expected Output	Actual Output	P/F
getValidChoice	1	Valid menu input	Input: 0	Prints "Exiting.."	Prints "Exiting.."	P
	2	Invalid menu input outside range	Input: 7, then 0	Displays error and reprompts	Displays error and reprompts	P
	3	Non-numeric menu input	Input: abc, then 0	Displays error and reprompts	Displays error and reprompts	P
registerAccountName	1	Valid account name	Input: Alexie Ilagan	Displays "Account Name = Alexie Ilagan"	Displays "Account Name = Alexie Ilagan"	P
getValidName	1	Empty account name	Input: Enter, then Andre	Reprompts; displays "Account Name = Andre"	Reprompts, then displays "Account Name = Andre"	P
getValidYN	1	Invalid Y/N response	Input: YES, then Y	Displays error and reprompts	Reprompts; returns to menu	P
depositAmount	1	Lowercase currency code	Input: usd; deposit 5	Updated Balance = 1310.00	Accepts USD; balance = 1310.00	P
	2	Currency not in database	Input: AUD, then PHP; deposit 100	Displays error; balance = 1100.00	Displays error; balance = 1100.00	P
	3	Valid PHP deposit	Input: PHP, 500	Updated Balance = 1500.00	Updated Balance = 1500.00	P
	4	Negative deposit	Input: PHP, -10, then 200	Reprompts; balance = 1200.00	Reprompts; balance = 1200.00	P
	5	Invalid infinite amount	Input: Inf, then 10 PHP	Reprompts; balance = 1010.00	Reprompts; balance = 1010.00	P
withdrawAmount	1	Valid PHP withdrawal	Input: PHP, 250	Updated Balance = 750.00	Updated Balance = 750.00	P
	2	Valid USD withdrawal	Input: USD, 2	Updated Balance = 876.00	Updated Balance = 876.00	P
	3	Withdrawal exceeds available funds	Input: USD, 500, then 5	Reprompts; balance = 690.00	Reprompts; balance = 690.00	P
	4	Zero withdrawal	Input: PHP, 0, then 100	Reprompts; balance = 900.00	Reprompts; balance = 900.00	P
recordExchangeRates	1	Record USD exchange rate	Input: 2; rate 52; deposit 10 USD	USD rate = 52; balance = 1520.00	USD rate = 52; balance = 1520.00	P
	2	Invalid rate inputs	Input: 0, -5, then 52	Rejects invalid values; accepts 52	Rejects invalid values; accepts 52	P
	3	Attempt to change PHP rate	Input: 1	Prints base currency warning	Prints base currency warning, returns to menu	P
	4	Cancel rate recording	Input: 0	Returns without changing rates	Returns to menu without changing rates	P

Method	#	Test Description	Sample Input	Expected Output	Actual Output	P/F
currencyExchange	1	Convert USD into JPY	Source: USD; 50; Target: JPY	Exchange Amount = 7750.00	Exchange Amount = 7750.00	P
	2	Negative source amount	Input: -5, then 50 USD to JPY	Reprompts; amount = 7750.00	Reprompts; amount = 7750.00	P
	3	Repeat currency exchange	USD 50 to JPY; Y; PHP 100 to USD; N	Prints 7750.00 and 1.61; returns to menu	Prints 7750.00 and 1.61; returns to menu	P
showInterestAmount	1	Display 5 days of interest	Balance: 1000; Days: 5	Day 5 balance = 1000.70	Day 5 balance = 1000.70	P
	2	Invalid number of days	Input: 0, then 2	Reprompts; day 2 = 1000.28	Reprompts; day 2 = 1000.28	P
main	1	Deposit and withdrawal in same session	Deposit 5 USD; withdraw 2 USD	Final balance = 1186.00	Final balance = 1186.00	P
	2	Exit after a transaction	Deposit 5 PHP; then N	Updated balance = 1005.00; exits	Updated balance = 1005.00; exits	P
